Session 21: Mechanical Behavior of Materials

Dear colleagues,

The 20th French Congress on Mechanics CFM 2011 will be held in Besançon (France), under the auspices of the Association Française de Mécanique (AFM), from October 28 to September 2, 2011.

Session 21 of this Congress will be more specifically dedicated to the “**Mechanical Behavior of Materials**”, with a special attention paid on experimental, theoretical, analytical and numerical approaches taking into account materials microstructure and specificities.

A wide range of materials and various aspects of their mechanical behavior will be addressed, so that this session will provide opportunities for scientists and engineers from different communities to meet and to discuss current research.

We invite you to participate in this Session and to submit an **abstract** of your contribution directly on the **website** of the Congress (www.cfm2011.fr), **before January 15, 2011**.

We are looking forward to meeting you in Besançon.

Best regards,

The Session 21 organizing committee,
Georges Cailletaud, Félix Darve, Vincent Keryvin, Sylvie Castagnet
