

GEOMECHANICS OF STRUCTURED MATERIALS - Special issue of "Soils and Foundations"
<http://www.jiban.or.jp/e/sf/contents/49-3.html>

The "Geomechanics of structured materials" was the topic treated during a specific session of the annual ALERT Geomaterials Workshop held in Aussois (France) from the 8th to the 10th October 2007. A general overview of the behaviour of structured geomaterials and a timely state of the acquired knowledge in this field of geomechanics, as close as possible to the current state of practice, was offered. This Special Issue, hosted by Soils and Foundations International Journal, includes most of the contributions presented during the aforementioned ALERT Geomaterials workshop session.

Contents:

- FOREWORD L. Laloui and V. De Gennaro
- Degradation of Compacted Marls : A Microstructural Investigation<<http://www.jiban.or.jp/e/sf/contents/49-3/49-3-1.html>> R. Cardoso and E.E. Alonso
- Identification of Bonded Clay Parameters in SBPM Tests : A Numerical Study<<http://www.jiban.or.jp/e/sf/contents/49-3/49-3-2.html>> N.A. Gonzalez, M. Arroyo and A. Gens
- A Multilaminate Model with Destructuration Considering Anisotropic Strength and Anisotropic Bonding<<http://www.jiban.or.jp/e/sf/contents/49-3/49-3-3.html>> V. Galavi and H.F. Schweiger
- An Approach to the Interpretation of the Mechanical Behaviour of Intensely Fissured Clays<<http://www.jiban.or.jp/e/sf/contents/49-3/49-3-4.html>> C. Vitone, F. Cotecchia, J. Desrues and G. Viggiani
- Behaviour of Unsaturated Aggregated Soil in Oedometric Condition<<http://www.jiban.or.jp/e/sf/contents/49-3/49-3-5.html>> A. Koliji, L. Laloui and L. Vulliet
- Comparison of Predictive Capabilities of Selected Elasto-Plastic and Hypoplastic Models for Structured Clays<<http://www.jiban.or.jp/e/sf/contents/49-3/49-3-6.html>> D. Masin

L. Laloui (EPFL, Switzerland) & V. De Gennaro (Ecole des Ponts ParisTech, France)
Coordinators and Guest Editors of Soils and Foundations
